

The Emil Racoviță Institute of Speleology is hiring a research technician in geosciences

We are looking for a technician to perform laboratory and field work, including sampling and preparation of lake sediments and speleothems with the aim of reconstructing past environmental change within the ECHOES project (<https://iser.ro/echoes/>).

Organization/Company: Emil Racoviță Institute of Speleology

Research Field: Environmental Science › Earth Science

Researcher Profile: First Stage Researcher (R1), years of Research Experience: 0

Application Deadline: 08/01/2023 17:00 - Europe/Athens

Location: Romania › Bucharest

Type of Contract: Temporary

Job Status: Part-Time

Hours Per Week: 20

Offer Starting Date: 15/01/2023

Contact: virgil.dragusin@iser.ro

Required Education Level

Geosciences: Undergraduate

Required Languages: Romanian: Good/English: Good

Skills/Qualifications

The candidate should demonstrate skills in laboratory preparation of sediment samples, especially in pollen extraction from sediments.

Specific Requirements

As the candidate will have to retrieve samples from caves, they have to demonstrate abilities in working in underground environments. They have to perform field work demanding physical fitness, working in low light, and small spaces.
